MONEY, STOCKS AND BONDS.

The Trusts Forced Down Still Further with a Slight Recovery at the Close. NEW YORK, July 13 .- Money on call was easy with no loans, closing offered at 212 per

cent. Prime mercantile paper, 412@612 per cent. Sterling exchange duli but steady at \$4.86 for sixty-day bills and \$4.87% for demand.

The total sales of stocks to-day were 89,529 shares, including the following: Atchison, 8,665; Delaware, Lackawanna & Western, 1,410; Lake Shore, 4,200; Louisville & Nashville, 3,360; Missouri Pacific, 2,689; Northwestern, 2,025; Reading, 5,300; Richmond & West Point, 2.010; St. Paul, 10,652; Union

Pacific, 3,400; Western Union, 1,765. The stock market showed a decidedly improved tone over that of yesterday, and before the session was over every department had scored material advances. At the opening the general list seemed to have recovered from the scare of yesterday, and while first prices were from 's to 's per cent. higher than last evening's closing figures, there was a very moderate business, with no pressure to sell. Some slight gains were scored by a few shares over the opening figures in the first few minutes, but the general run of stocks yielded slightly from first prices, the fluctuations, however, being small and without significance. The trusts, however, were again made the objects of improved tone over that of yesterday, and small and without significance. The trusts, however, were again made the objects of attack by means of liberal short sales, but the excitement of yesterday was lacking, and no large amounts changed hands after the first few minutes. Lead showed some strength at first, but later was forced off to 23, against 25½ last evening; Chicago Gas to 54½ against 58½, and Sugar to 108 against 109½. The covering then began, and prices' outside of Lead, were lifted rapidly, and Sugar rose to 11138, Lead to 25½, and Chicago Gas to 58. The general list, which had not seemingly been affected by the weakness in the trusts, also felt the by the weakness in the trusts, also felt the stimulus, and everything on the list rose, the gains extended to about 1 per cent., with the grangers most prominent in the movement. London was a purchaser, and the prominent dealers on the floor aided in the prominent dealers on the floor aided in the advance, while the trusts seemed to be supported by insiders. The market held its improved appearance until the close, which was quiet but strong at the best prices reached.

Railroad bonds were dull, the sales of all issues reaching only \$375,000, and the dealings were confined to a comparatively small number of issues. The market showed a firm tone, but the changes in

showed a firm tone, but the changes in quotations were entirely insignificant, excent in a small number of cases. Sales of bonds for the week, \$5,894,000, against \$5,112,000 for last week. Government bonds were dull and steady.

State bonds were neglected. Closing

TRADING AT CHICAGO.

The Ups and Downs of the Market, with the Range in Prices of Leading Articles. CHIGAGO, July 13.-There was fairly good trading in wheat, but most of the business was transacted early in the session. At the start a feeling of firmness existed, but this soon gave place to a weak and panicky feeling. The opening was strong, and prices, after some slight fluctuations, were advanced 12@34c, influenced some by firm cables and wet weather in England, and a rumor through private sources that late cables noted a stronger tone. Liverpool was quoted firm and slightly higher, but public London cables quoted cargoes on passage as easier and neglected, and this created a suspicion that the late cables have been manufactured nearer home. But the advance was only temporary, for selling soon started in, which caused a steady shrinkage in prices, and developed a decidedly weak feeling by the time the estimated receipts for Monday were made known. It was estimated that 101 cars of wheat would be received here Monday, of which eighty-three cars would be new and sixty-three cars of the new grade No. 2. St. Louis, it was reported, would show up with 300,000 bushels of wheat on Monday, and the increasing receipts was the principal factor. 300,000 bushels of wheat on Monday, and the increasing receipts was the principal factor of the market. Selling became general, and prices declined 234c for July and 134c for the deferred futures, and closed 2c lower for July, and 78214c lower for the other futures than yesterday. A prominent local trader was reported as being a free seller. Corn ruled rather quiet the greoter part of the session, though there were periods of moderate activity. The feeling was rather easier, and slightly lower prices were established, fine weather for the growing crop and the decline in wheat being depressing influences, and had a tendency depressing influences, and had a tendency to increase offerings. The market opened at yesterday's closing prices and sold off gradually 4c, remained quiet and inactive, changing but little, and closed 1st 4c lower than yesterday. In oats an active business transpired within a narrow range of prices.

Trading was only moderate in mess pork.

INDIANAPOLIS MARKETS. Trade Hardly Up to Expectations, Yet Fully Up to the Usual Summer Average.

INDIANAPOLIS, July 13. The trade of the week did not reach the expectations of most wholesale men, yet when compared with that of the corresponding week of 1888 the exhibit is favorable. In prices there were but few changes. Sugars and coffees carry a steady tone, and coffees are stronger than in the early part of the week. Sugars are unquestionably in a strong position. The price of raw sugars in London to-day is double what it was a year ago. London is the central market for year ago. London is the central market for sugars. Hence it appears that the advance in the cost of sugar has been due mainly to natural causes and quite independent of the trust. The point is also made that raw sugars are to-day cheaper in this country than they would be were there no trust; for there is but one buyer where there would otherwise be twelve competing buyers, each ready to go a trifle better than the others in the emergency of a short crop. The produce market ruled weak on large receipts. Eggs, butter and poultry are coming in freely for the season. Many of the eggs are poor, and much of the butter is not first-class. In small fruits there is considerable doing, yet so many of the berries are inferior and soft, that it hurts the trade. Apples and new potatoes are in abundant supply and selling low. Tomatoes are arriving in larger quantities, and prices range lower. Lemons are in active demand and firm. But few oranges are selling. The hide market is flat. The provision market is fairly active in a jobbing way, with prices ruling easier. The flour market is moderately active at unchanged prices. prices.

Quite a number of the association's members are just returning from vacations. They will soon start out on their usual trips to sell fail and winter goods. An invitation has been extended to all old and delinquent members of the T. P. A. in this city to come back and join the association. All mem-

bers who wish to accept can do so by paying \$3 dues. They can also get back their original num-H. V. Root, of Fort Wayne, president of the National T. P. A., visited the headquarters in Chicago, and spent several days with Secretary Silverstone last week. So many changes were made at the last convention that the secretary is crowded with work at present.

A list of concessions granted by hotels, livery and transfer companies has been mailed to every member of Post B. Circulars showing the new plan of burial fund and other work accom-plished at last annual convention have also been sent out. The State secretary will forward the pamphlets and circulars to all members in the State outside of the post named.

Many of the badges worn at the last annual convention were quite elaborate, some being made of celluloid and others of silver, brass, rolled plate and enamel work. Those of the Colorado delegation were ornamented with valuable stones found only in that State. The medallion badges presented as souvenirs by the Pennsylvania division were, no doubt, the most expensive and prettiest, being made of silver, gold and enamel work in colors.

C. S. Downing has been appointed chairman of the press committee by Post E and the Lafayette Sunday Times selected for publishing T. P. A. news in that city. All posts in Indiana have promised to appoint committees for press-work at once. The enthusiasm shown by some of the younger posts is appreciated by all old members, and the ex-ample could well be followed by others, es-pecially in the matter of having club-rooms like those Lafayette has.

New studies are introduced, from time to time, into the curriculum of educational institutions. In a circular issued by a successful private school up town it is announced that, besides the course of study in the ordinary branches, "instructions will be given in describing and classifying plants," and the following words are indicative of the range of teaching in this line: "Plants-Curious features of their growth and development noted; a study of | just at a time when it will be most weltree blossoms and common flowers.'

DAY AN NIGHT.

The Condition Was Always the Same

Having Tested for Herself She Is Confident and Truthful in What She Says-Happy Results.

"There are many acts happening about us every day which call out not only our sympathy and gratitude, but they demand our respect. They are those things which money does not pay for, and when one has been brought face to face with such facts they are not to be put down or hid behind false impressions of due propriety. It was thus I felt when I consented to make a public statement of facts known best to myself and friends," said Mrs. Levina Yant, of No. 91 Decatur street, West Indianapolise

"I had been afflicted for the last fourteen years with a long list of symptoms, which are too disagreeable to repeat here. But let me say that the many aches and pains, with restless days and sleepless nightssick in mind and body-is too fresh in my memory to be passed without notice. It is not possible for one who is hale and hearty to realize the meaning of such words, and I do not look for any sympathy or compassion from any such. But those who have endured such pain and misery well know what condition of mind and body I was in, when, after waiting and trying for years for the needed relief. I finally decided to try the method that so many others had found successful. I had read many statements of patients with a most skeptical eye and was long in making a decision; but after a final consideration I determined to investigate to my own satisfaction. I began Blair Treatment some four months ago, and have continued it diligently and faithfully to a successful termination. My head and chest are clear and free from pain. My eyesight, which was very defective, has improved wonderfully. My appetite is good and I rest as peacefully as a child, and, indeed, I believe I am fully recovered from my many ills."

Mrs. Levina Yant is a modest, retiring little lady, who, though naturally reticents will gladly verify her statement, and give any information in her power.

An Unusually Short Name.

Nashville American's Paris Letter. A funny fact came to light recently at the registration of the birth of a child. The happy father was asked the maiden name of his wife, to which he answered:

"Rose B." "Well, how do you spell it? Bee, By, Bey,

or how?" "Just simply B." "That cannot be. B is only an initial, not a name." "It is all the name my wife ever had un-til she married me. Neither she nor any of

her family have ever had any other name than just B, neither more nor less."

They could hardly have had less, and an examination of the records showed that they had really never had more. Beyond doubt the B family bears the shortest name in France, perhaps in the world. Only one other name of equal brevity is known, and that is the name of a place. About fifteen miles from Peronne, on the Ham line, there is a commune known as Y. It has some two hundred inhabitants. The origin of the name of Y is unknown, and it would be curious to investigate the origin of the patronymic of the B family.

Good Work for the Christian Endeavorers

The members of the Christian Endeavor Society have been doing good in a way that perhaps they never thought of. They have been helping the hotels over one of the dullest periods of the year. They have received agreeable rates, to he sure, but they will pay altogether in hotel bills some \$10,-000 that will come into the hotel cash boxes
